

(Mail Special to the Advertiser).

AS TO THE DEFICIT.

In business circles, and the party in power will suffer, especially as a Congressional election will follow the next session. The ablest and nearly all the prominent and members of Congress from Washington precludes any vigorous discussion of tariff in official circles but it is breaking out in spots over the country, wherever Senators or members with pronounced views on the subject happen to be and as soon as any number of them get back here to Washington the pot will boil vigorously.

THE TARIFF ISSUE

There is a prevalent feeling here that the next year or two are to be very important ones in matters of national administration. The country is agog with interest over economical and socialistic problems and looking to the President and to Congress to do much to cure existing evils.

PERSONAL NOTES

"Just now we are prosperous in Hawaii because of the high price of sugar. In the islands sugar is the keynote to the entire industrial and financial situation, and everything is dependent upon it. When it brings a good price we are about as well off as any people could ask; where the market is pressed, our fortunes sing to a low ebb, because there is no other source of revenue.

Col. Rubin of the Quartermaster General's office said today that the plans for the barracks at Honolulu had been approved by the Quartermaster General, there having been no changes from the description sent to the Advertiser about a month ago. The specifications for the advertisements are now being prepared. These will be sent to Honolulu, San Francisco and perhaps to other cities. Col. Rubin, who has had immediate charge of this work, said there would be no provision in the advertisement to exclude foreigners from bidding on the construction work.

FIGHTING MOSQUITOES.

er, and the plan for the purpose has been worked out at this institute. It is necessary in the first place to destroy, before warm weather sets in, the mosquitoes which pass the winter in the cellars and basements of houses. These cellar and basement mosquitoes will be destroyed by municipal experts without inconvenience to the people and without injury to property. In order to make it possible to carry out the plan successfully, we respectfully request the admittance of the disinfectors to the cellars of houses and permission for them to take the steps necessary to kill the mosquitoes. The disinfectors will have identification cards.

QUESTION OF VERACITY AMONG THE STATESMEN

(From Wednesday's Advertiser.)

The House yesterday received the reply of the Attorney-General to its questions about the County Act, and squelched the attempt of a lot of Maui politicians to collect for services performed in offices to which they were elected under the last county act.

THE SENATE.

The vote was then about to come on the bill, when Dowsett asked if the other islands were not going to consent to some reductions in their appropriations.

"As it stands now," said Paris, "Hawaii has \$20,000 more than is called for in the bill, Maui has \$32,000, Kauai \$50,000 and Oahu \$10,000 or \$15,000 more than is called for in the committee reports."

Woods moved to cut the item of \$8000 for a new road in Kohala to \$5000. This carried.

PUBLIC BUILDINGS CUT.

Paris moved to strike out the item of \$1000 for a lurch road, Kealia to Hookuna. Carried.

On Dickey's motion, the Maui building item was reduced from \$25,000 to \$15,000, and the Maui school house item from \$15,000 to \$13,000.

recognizable with difficulty by those not experts, but cover the ceilings by thousands. In the spring they leave and lay their eggs in water, the larvae producing mosquitoes within three to four weeks. A supplemental effort will be made to destroy the larvae, which

quito plague. If it proves successful it will be extended next year over the whole city. Fighting mosquitoes will be carried on in a systematic manner on a scientific basis. Summer resorts and watering places, especially, should imitate the example set by Breslau."

ERNEST C. WALKER

ATTORNEY GENERAL REPLIES

Third: In answer to your third question as to whether I have stated to H. E. Cooper and T. McCants Stewart that I desire them to assist me in defending the act, and as to whether I have had any correspondence with them I would reply, that I requested both these gentlemen, who had acted as commissioners in drawing up the act, to assist my office, provided that they would perform said services gratuitously, and that I understood both gentlemen to accept the offer, but later had my doubts as to Mr. Stewart's accepting the same without fee. As a result, I wrote these gentlemen the letter attached hereto and have received an answer from Mr. Stewart, a copy of which I hereby attach.

In closing I would state that under the Organic Act it is the duty of my office to represent the people in all government suits and I would be derelict in my duty if I should require the government to pay large sums of money to other counsel for attending to these duties.

Copies of the letters to Cooper and Stewart were enclosed, as was Stewart's answer to the effect that he would be glad to give his services to the public free of any charge.

WANT MORE SCHOOLS.

The House rose at noon, taking a recess until 10 o'clock this morning.

GOVERNOR HAS SIGNED

SOTO'S DEATH WARRANT

(From Wednesday's Advertiser.)

Accompanying them will be Miss Margaret Hyde-Smith, their guest. This charming and popular young girl is looking forward with keen expectation to the joys in store for her.—Chronicle.

CHILDREN WHEN TEETHING.

This is the most dangerous age in the life of a child. At this time they have more or less diarrhoea, which weakens the system and renders the child more susceptible to disease. Any unusual looseness of the bowels should be promptly controlled, which can be done by giving Chamberlain's Colic, Cholera and Diarrhoea Remedy, with an occasional dose of castor oil to cleanse the system. For sale by all Dealers and Druggists. Benson, Smith & Co., Ltd., agents for Hawaii.

THIRTY DAY ADJOURNMENT

In the meantime the members of the legislature who have a regard for their political future have evolved a scheme by which it is hoped that a second extra session will be avoided, even if the County Act should be declared invalid. The plan, it is said, is for the legislature to finish up the appropriation bills as they have been drawn, namely making allowances for the counties.

It was hoped that these bills could be finished up this week, permitting the legislators to go home and put up their fences in the county elections, but the delay of the current expense bill and the salaries bill in the Senate has made this impossible, and the best that can be done now is to finish up next week.

Some of the leaders, especially in the House, have therefore evolved the plan of an adjournment for thirty days instead of finally, and then, if the County Act is declared invalid, the members can get together again after the courts have acted and pass the regular appropriation bills in regular fashion. If the County Act is sustained, on the other hand, they can get together and at once adjourn without day.

It is claimed that the legislature has a perfect right to do this, under the provisions of the Organic Act. That Act provides that neither House of the legislature can adjourn for a longer period than three days without the consent of the other. The logical deduction from this is that both houses can adjourn for any period within the sessional period by mutual consent, the time for such adjournment of course coming out of the sixty days which is the life of the session.

This would avoid the expense of a second extra session. In case the appropriation bills should pass with county allowances and then have to be changed when the County Act was knocked out. However, the matter is in the tentative stage as yet, although official advice has been taken upon it. The two houses are hard at work, and should finish up their labors within a few days at farthest.

"I would like to see an appropriation," said Governor Carter, "for stocking our island streams with fish from Mexico, where there are varieties to be had which may be expected to prosper here. The plan was suggested by Dr. David Starr Jordan when he was here, and he has offered to help us in the matter." The fish are counted upon to aid the campaign against the mosquito, and the Governor estimates that \$1000 would be enough for the purpose.

OF THE MULTITUDES

who have used it, or are now using it, we have never heard of any one who has been disappointed in it. No claims are made for it except those which are amply justified by experience. In commending it to the afflicted we simply point to its record. It has done great things, and it is certain to continue the excellent work. There is—we may honestly affirm—no medicine which can be used with greater and more reasonable faith and confidence. It nourishes and keeps up the strength during those periods when the appetite fails and food cannot be digested. To guard against imitations this "trade mark" is put on every bottle of

"Wampole's Preparation," and without it none is genuine. It is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil extracted by us from fresh cod livers, combined with the Compound Syrup of Hypophosphites and the Extracts of Malt and Wild Cherry. Taken before meals it creates an appetite, aids digestion, renews vital power, drives out disease germs, makes the blood rich, red and full of constructive elements, and gives back to the pleasures and labours of the world many who had abandoned hope. Doctor S. H. McCoy, of Canada, says: "I testify with pleasure to its unlimited usefulness as a tissue builder." Its curative powers can always be relied upon. It makes a new era in medicine, and is beneficial from the first dose. "You can trust it as the Ivy does the Oak." One bottle convinces. Avoid all unreliable imitations. Sold by chemists throughout the world.
